House Description

This custom-feel ranch provides an expansive layout that opens to outdoor views and creates two distinctive wings – one for the private master retreat and another for family living spaces and guest bedrooms. The floor plan offers 3,384 sq ft of living area, three bedrooms, four bathrooms, and a slab stemwall foundation. Inside, arches lead down the gallery toward the family area of the home. This area focuses around a spacious leisure room that features a wall of built-ins and a space for an optional fireplace. A veranda wraps the rear and provides multiple outdoor living opportunities.
