### House Description

A wonderful streetscape is pronounced on this family stucco home. It has 3,301 spacious square feet of living area, four bedrooms with three full bathrooms and 1/2 bathroom. A turret study and raised entry highlight this elegant residence. Half round columns at the entry add an intricate element that gives the design a custom feel. The entire home is focused around the outdoors. All the main living spaces have glass windows or retreating walls to the outside to take advantage of natural light and ventilation. Even the utility room area has windows. The plan, with minor modifications, can be built without the guest suite so it can fit on a narrow depth lot.
