House Description

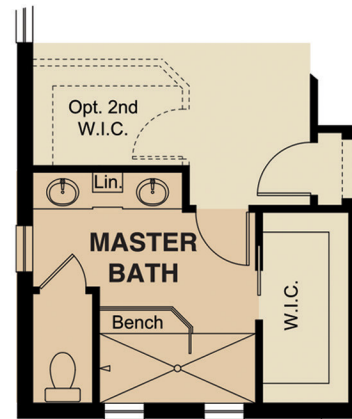

Openness and flexibility best describe this modern floor plan. Three bedrooms and two baths configured in a split-plan design will always give you and your guests' privacy. A beautiful sliding barn door accesses a bonus room that can serve as a study, den, or fourth guest room. The open kitchen features a large island and lots of counter space. Adjacent to the kitchen is a large casual dining room that features oversized windows to take advantage of the lanai and back yard beauty. A large sliding glass door ensures lots of natural light pours in from the lanai. The master bath has three different layouts to choose from! The first includes a true his and hers massive shower with separate bathing areas. The second adds a free standing tub with a traditional sized shower and the last increases one of the walk-in closets if you need more storage space. With all this, it's hard to find another design that can offer you more in 1900 square feet!
