House Description

This innovative design brings the incredible floorplan of The Buckhorn to the next level, with enhancements that add value and create a home that serves the modern family well. The Great Room and Kitchen have been expanded, allowing for smart additions such as increased storage in the kitchen island and a walk-in pantry. The Master Bedroom offers a private sitting area and your choice of three bath configurations, allowing you to create a peaceful suite just for you. Both the Master Bedroom and Great Room open to a generous lanai to enhance your outdoor entertaining. Bedroom 3 can be utilized as a second master with its en-suite bath and large walk-in closet. The study offers generous closet space enabling it to serve as a true 4th bedroom with a powder bath added close by. The larger Utility room is now in a more discrete location. Finally, the Garage and overhead door have been enlarged making it taller and wider to accommodate full size trucks & SUV's. These changes in the floorplan increase the home's size and will suit your family's comfort level.
